

# US HSE Tool Box For E&P

*The US HSE Toolbox for E&P Operations is a collection of templates and guidelines intended to enhance Health, Safety and Environmental programs.*

# US HSE Tool Box For E&P

According to OSHA's General Duty Clause, companies doing business in the United States have the responsibility to provide a workplace free from recognized hazards.

# US HSE Tool Box For E&P

Each company has individual responsibility for developing, implementing and maintaining its Health, Safety and Environmental Program.

# US HSE Tool Box For E&P

Information contained herein has been donated by E&P companies and public and private sources with permission, and copied from public websites.

***Information contained in this toolbox is presented in good faith, however accuracy and completeness of content is not guaranteed.***

# US HSE Tool Box For E&P

***If I use information from this toolbox, I agree to consult with experts and/or legal counsel, in advance, to determine the accuracy and applicability of any information I intend to use.***

# US HSE Tool Box For E&P

Now go forth and build a great Safety Health and Environmental program.

Work to build a team, not just a business.

# US HSE Tool Box For E&P

Let's all work together to see Moms, Dads, Daughters and Sons, Uncles and Aunts get home to their families safely each day while providing energy for the world..

# US HSE Tool Box For E&P

Consult with, Listen and Respond to your Employees, Partners, Regulators and Competitors to help raise the standards of our industry.

Only by working together can we achieve Incident and Injury free operations.
